CAN Gateway

Overview

“CAN Gateway” is an add-on device that gets CAN information from vehicles. It realizes advanced management of vehicle condition.

Features

CAN Gateway

It gets not only CAN information, but also multiple sensor information such as temperature and humidity.

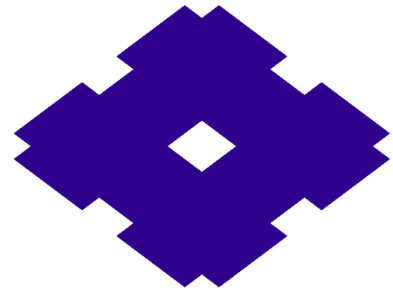

You can send vehicle condition data to cloud servers by mobile network and analysis it.

<How to get information ? >

“CAN Gateway” gets CAN information from vehicles by connecting with “Data Link Coupler(DLC)”.
