Sumitomo Electric Industries, Ltd.

Sumitomo Electric Exhibits at DISTRIBUTECH International 2023

Sumitomo Electric Industries, Ltd. will exhibit at DISTRIBUTECH International 2023, the world's largest electric power related technology exhibition to be held from February 7 to February 9, 2023, at the San Diego Convention Center, U.S.A.

Booth design sample

DISTRIBUTECH International is the world's largest electric power related technology exhibition, attracting more than 500 exhibitors from around 100 countries involved in the power industry and around 12,000 visitors for specialized technologies, products, and talk sessions.

Sumitomo Electric will introduce its redox flow battery, a storage battery that stable power supply with features such as high safety, long life, and a high design flexibility. Presentations will also be made at its booth introducing the principles and features of the battery, as well as examples of past applications and the results of demonstration projects.

We are looking forward to your visit at our booth.
